

ADVANCING ADAPTATION IMPLEMENTATION

ONLINE PEER LEARNING GROUP

WEBINAR SERIES

You're Invited!

Join us for a deep dive into the challenges and opportunities of advancing adaptation implementation in Canada's natural resource sectors.

The Climate Risk Institute is proud to host an inaugural webinar series to mark the official launch of [Advancing Implementation in Canada's Natural Resource Sectors](#) — a **free, online peer learning community** dedicated to advancing climate change adaptation implementation in practice. As the group's first offering, the series provides a unique opportunity for professionals across **forestry, mining and energy sectors** to both share their own experiences and learn from others' real-world approaches to adaptation implementation.

Join dynamic, sector-specific webinars with guest speakers and interactive discussions where we will explore the **drivers, enablers, and barriers (DEBs)** that shape **adaptation implementation** in Canada's natural resource sectors. By sharing insights and validating emerging findings, you'll contribute to a growing knowledge base that fuels the creation of practical tools and resources—empowering stronger, more effective implementation across natural resource sectors.

Webinar Title	Date and Time (90 minutes)
Shaping Our Peer Learning Community: Kickoff for Advancing Adaptation Implementation	October 9, 2025 - 1:00pm ET
Implementation Insights in the Forestry Sector	October 16, 2025 - 1:00pm ET
Implementation Insights in the Energy Sector	October 23, 2025 - 1:00pm ET
Implementation Insights in the Mining Sector	October 30, 2025 - 1:00pm ET

Webinar Registration

Open to members and non-members of the Advancing Implementation peer learning group.
